Santa Barbara, CA | (702) 771-8883 | junjie.6liu@gmail.com | [LinkedIn](#) | [Portfolio](#)

EDUCATION

University of California, Santa Barbara

June 2026

Bachelor of Science in Computer Science | Santa Barbara, CA

Relevant Coursework: Data Structures & Algorithms, Programming Languages, Computer Architecture, Artificial Intelligence, Machine Learning, Computer Networks, Operating Systems, Mobile App Development, Human-Computer Interaction

PROJECTS

League Draft Assistant | Desktop Application

Aug. 2026 - Present

Electron, React, TypeScript, Node.js, Express.js, WebSockets

- Developing a Windows desktop companion that integrates with the League of Legends client to track champion-select in real time, identify picks, bans, hover intents, roles, and draft state, and provide contextual champion recommendations.
- Designed an event-driven integration with the local League client using authenticated HTTPS and WebSocket communication, including reconnection handling, debouncing, runtime validation, and real-time UI synchronization.
- Built a secure Electron architecture with isolated renderer processes, preload APIs, and IPC, and integrated Riot Data Dragon metadata for champion names, roles, icons, and game data.

DireConnect

Apr. 2026 - Jun. 2026

Next.js, React, TypeScript, Express.js, PostgreSQL, Prisma, Redis, BullMQ, AWS, Docker

- Built a full-stack SaaS platform that helps small business owners manage customer data and create targeted email marketing campaigns from a centralized dashboard.
- Designed Express.js APIs and PostgreSQL data models with Prisma and Zod validation for businesses, customers, campaigns, recipients, message logs, and authenticated owner workflows.
- Implemented asynchronous campaign processing with BullMQ and Redis, plus AWS deployment, CI/CD, automated testing, and production monitoring.

Planet Story Explorer | Planet Labs Capstone

Sep. 2025 - Mar. 2026

React, TypeScript, FastAPI, PostgreSQL, Gemini API, FastMCP, Railway

- Rebuilt a satellite-story platform with Planet Labs for 35,000+ public Planet Stories, transforming a limited legacy site into a searchable, map-based exploration experience.
- Built frontend search, geospatial filters, sortable metadata views, and map-based browsing to improve story discovery by location and theme.
- Developed an AI chatbot and MCP server with Gemini API and FastMCP for story lookup, enriched metadata retrieval, and AI-assisted exploration workflows; helped deploy the platform for broader reuse.

EXPERIENCE

Dining Hall Student Manager

Sep. 2024 - Mar. 2026

UC Santa Barbara Housing, Dining & Auxiliary Services | Santa Barbara, CA

- Led daily operations and supervised student teams in a fast-paced service environment.
- Improved team coordination, workflow reliability, and day-to-day operational efficiency.

SKILLS

Languages: C++, Java, JavaScript, Python, TypeScript, HTML, CSS, SQL

Frameworks & Libraries: React, Next.js, React Native, Electron, FastAPI, Flask, Node.js, Express.js, Tailwind CSS

Databases / Platforms: PostgreSQL, MongoDB, Redis, Supabase, Firebase, AWS, Linux

Tools: Git, GitHub Actions, Docker, Prisma, BullMQ, WebSockets, REST APIs, Sentry, Jest, Vitest, Playwright, CI/CD
